

Mobile Tool Torque Station - MTTs

The Mobile Tool Torque Station (MTTS) is a portable Tool station which also provides a reliable platform and surface to test the Torque readings of your Tools at the side of the production line and a useful storage trolley for all of your Tools and Torque testing equipment.

The MTTs is compatible with the complete range of Torque management and measurement Tools from Crane Electronics and can be supplied as a simple Tool station or equipped to your specifications.

The Mobile Tool Torque Station is perfect for the measurement of all continuous drive, impulse and hand Torque Tools.

Key Features:

- ✓ Flexible design, light and easy to manoeuvre
- ✓ Durable and robust wheels for portable line-side Tool testing
- ✓ Solutions for various Torque ranges from 0.2Nm upwards
- ✓ Optional Rotary or Static Torque Transducers
- ✓ Vertical or horizontal Transducer mounting available
- ✓ Optional Joint Kits for simulation of Hard and Soft Joints
- ✓ Optional Torque Data Collectors
- ✓ Can also be customised with printers, barcode scanners and various screen & panel options
- ✓ Can be configured to communicate with your system or Crane's OMS software

The MTTs can be supplied as a simple, stand alone Torque Tool station or it can be configured to your specifications with a bespoke finish, utilising our Torque Transducers, Data Collectors, Joint Kits and Torque Software.

All MTTs trolleys are supplied with a lockable compartment for safe Tool storage and with a robust handle for easy pushing, pulling and manoeuvring.
